

Baba is You: Rewrite the Rules.

In most games, mastering the rules are the key to success. Up is jump. WASD is move. Click is shoot.

Forget about all of that. When Baba is You, you make the rules.

Game conditions are placed as physical objects within the world. Rearrange them to change how objects behave, who you control, and even the way to win the level. In this truly one-of-a-kind puzzle game, a straightforward core mechanic quickly creates mid-bending results.

Baba is You says: Don't just think outside the box. Make it float, move independently, open doors or transform into another Baba. Experimentation is always rewarded, and even if you don't win, you'll certainly have a few "Huh, I can do that?" moments!

Complimented with simple yet endearing graphics and a charming soundtrack, it's no wonder Polygon named it "one of the best puzzle games in years".

Game is Here.

You is Intrigued.

Baba is You.

Available on PC (MacOS, Windows and Linux via Steam, itch.io and Humble Store), Nintendo Switch, Android and iOS.
